CAREER OBJECTIVE

Detail-oriented MCA student with a strong foundation in MERN Stack development, Python, and Java. Proficient in building responsive full-stack web applications, integrating RESTful APIs, and developing scalable backend solutions. Passionate about software development, problem-solving, and learning new technologies. Seeking an entry-level Software Developer or Full-Stack Developer role where I can apply my technical skills, contribute to innovative projects, and grow as a professional.

EDUCATION

Course	Institute	Year of Passing	Result
MCA	SRM-IST University	Pursuing	8.6 SCGP
BCA	IIMT University	2025	8.0 CGPA
12th	The Avenue Public School	2021	93%
10th	The Avenue Public School	2019	75%

INTERNSHIP EXPERIENCE

Frontend Developer Intern
MDG Online Services Pvt. Ltd. (MyDailyGoods)
May 2026 – June 2026

- Worked with the frontend development team to design and optimize responsive web pages.
- Improved website layouts and user interface for better user experience.
- Assisted in implementing responsive designs using HTML, CSS, JavaScript, and modern frontend practices.
- Collaborated with team members to complete assigned development tasks within deadlines.
- Gained practical experience in web development, UI optimization, and teamwork in a professional environment.

PROJECTS

E-Commerce Web Application

- Designed and developed a responsive e-commerce website
- Included product detail page with interactive features
- Implemented add to cart functionality for easy purchasing
- Created product checkout page for smooth and secure transactions
- Designed a user-friendly login and signup page
- Ensured all necessary details are included in each page

Car Rental Web Application | MERN Stack (MongoDB, Express.js, React.js, Node.js)

- Developed a full-stack car rental platform that allows users to browse, book, and manage car rentals online
- Designed responsive frontend using React.js with reusable components for car listings, booking forms, and user dashboard
- Implemented RESTful APIs using Node.js and Express.js for handling bookings, user authentication, and car management
- Integrated MongoDB for efficient storage of user data, car details, and booking records

- Added user authentication and authorization (Login/Signup) using JWT
- Developed admin panel to manage cars, users, and booking approvals
- Implemented dynamic pricing, availability checking, and booking status tracking
- Ensured mobile responsiveness and optimized UI performance

Stock based & News Email Alert System | Python, REST API

- Built an automated Python application that monitors stock prices using the **Alpha Vantage API**.
- Retrieved the latest stock price data and calculated daily percentage changes.
- Integrated a news API to fetch the latest news articles related to selected companies.
- Sent automated email alerts containing stock performance and relevant news updates to users.
- Used REST APIs, JSON data parsing, and Python's Requests library for seamless API integration.
- Secured API credentials using environment variables.

Technologies Used: **Python, Requests, REST API, SMTP, Schedule/Cron, Environment Variables**

SKILLS

Technical Skills

- HTML5, CSS3, JavaScript (ES6+)
- React.js, Bootstrap, Tailwind CSS
- Node.js, Express.js, MongoDB
- REST API Integration
- Git & GitHub

Core Concepts

- Responsive Web Design
- Component-Based Architecture
- State Management (Basic)

Programming

- Java, Python
- Node.js, Express, MongoDB
- ReactJS, Bootstrap, Tailwind
